Milk Marketing Areas Under Federal Orders WITH Population Data

U. S. DEPARTMENT OF AGRICULTURE / Agricultural Marketing Service / Milk Marketing Orders Division

Federal milk marketing orders are established under the authority of the Agricultural Marketing Agreement Act of 1937, as amended. The Secretary of Agriculture is authorized by this statute, under certain conditions, to issue milk marketing orders establishing minimum prices which handlers are required to pay for milk purchased from producers. Such orders define marketing areas within which all milk sales are subject to the specified prices.

This bulletin presents background information on the marketing areas for use in evaluating other statistical material on Federal milk order markets. It lists the population in Federal order marketing areas as of January 1, 1952, and January 1, 1962, with detailed tabulations for the latter date. It also describes all changes in marketing areas during the ten year period.

The population data are tabulated according to the United States Census of Population for 1960. Persons in the Armed Forces quartered on military installations were enumerated as residents of the States, counties, and minor civil divisions in which their installations were located.

Estimates have been made for some marketing areas, the boundaries of which do not conform to the boundaries of any political subdivisions listed in the Census. Some minor inaccuracies occur because of territory annexations or other changes in the boundaries of cities, towns, or townships which occurred after the area was defined, since the order definition does not change with such annexation or other boundary change.

Issued June 1963
